Hiring Manager, Engineering
Signia Aerospace — Onboard Systems Hoist & Winch
Anaheim, CA

RE: Application for Electrical Engineering Technician

Dear Hiring Manager,

I am writing to express my strong interest in the Electrical Engineering Technician position at Onboard Systems Hoist & Winch in Anaheim, CA. Holding a Master of Science in Electrical Engineering (MSEE) from Loyola Marymount University, a Bachelor of Science in Electrical Engineering (BSEE) from Cal Poly Pomona, and hands-on experience fabricating test fixtures, building prototype cable assemblies, and performing electro-mechanical troubleshooting, I offer a well-rounded skill set directly aligned with your mission equipment support needs.

Throughout my career across defense, computing, and medical device environments, I have worked alongside electrical and R&D engineers to translate engineering schematics, wiring diagrams, and technical drawings into physical, high-reliability test boxes, wiring harnesses, and prototype hardware. At General Micro Systems, I built, tested, and validated ruggedized computing hardware, network switches, and custom cabling assemblies while authoring step-by-step assembly instructions and test procedures.

My technical foundation also includes precision electro-mechanical assembly, prototype instrumentation fabrication, and verification & validation (V&V) at Alcon using high-speed oscilloscopes and logic analyzers. Additionally, my background at Micro Analog Inc. performing ICT and functional testing equips me with component-level troubleshooting capabilities, crimping, connector assembly, and precision SMT soldering skills.

Residing in Ontario, CA, I am within a 30-minute commute via CA-91 W to your Anaheim facility and ready to support your Search & Rescue (SAR) and Human External Cargo (HEC) mission equipment programs. Thank you for your time and consideration, and I look forward to discussing how my fabrication, harness routing, and electrical testing background aligns with your engineering team's goals.

Sincerely,
Jim Ngo
