RE: Application for Infrared Electrical Field Testing & Maintenance Engineer

Dear Hiring Manager,

I am writing to express my strong interest in the Infrared Electrical Field Testing & Maintenance Engineer position at SI Testing in Rancho Cucamonga, CA. Holding a Master of Science in Electrical Engineering (MSEE) from Loyola Marymount University, a Bachelor of Science in Electrical Engineering (BSEE) from Cal Poly Pomona, and extensive practical expertise in electrical circuit testing, power systems analysis, and hardware diagnostics, I bring both deep technical fundamentals and hands-on operational capability to your field team.

Throughout my career, I have performed complex electrical diagnostics, root-cause failure analysis, and system verification across diverse industrial environments. My early engineering work at Hughes Aircraft focused on power supply efficiency and stability analyses, providing me with a thorough understanding of power distribution, thermal management, and electrical sub-system performance. At Micro Analog Inc., I executed ICT and functional testing on complex analog and digital boards, isolating component-level defects and restoring system integrity.

Additionally, during my time at General Micro Systems and Alcon, I authored detailed technical procedures, configured custom test setups, and operated high-precision lab and diagnostic instrumentation to resolve hardware anomalies. My mechanical background, combined with rigorous electrical training, enables me to evaluate commercial power distribution setups, execute infrared thermal inspections, and perform field-level maintenance safely and methodically.

Residing locally in Ontario, CA, I am just 10–15 minutes from your Rancho Cucamonga facility and ready to contribute immediately to SI Testing's client projects and field diagnostic operations[cite: 1, 3]. Thank you for your time and consideration, and I look forward to discussing how my electrical engineering background aligns with your team's field testing needs.

Sincerely,
Jim Ngo
