Hiring Manager, Test Engineering
L3Harris Technologies
Anaheim, CA

RE: Application for Specialist Test Engineer (Power & Digital Systems)

Dear Hiring Manager,

I am writing to express my strong interest in the Specialist Test Engineer position at L3Harris Technologies in Anaheim, CA. Holding an MSEE from Loyola Marymount University, a BSEE from Cal Poly Pomona, and a rich background spanning power supply modeling, digital circuit testing, and hardware failure analysis, I bring both technical rigor and practical bench-level test expertise to your team.

Throughout my career in defense, computing, and medical instrumentation, I have specialized in configuring test setups, executing functional verification, and performing component-level troubleshooting on complex electronics. At Hughes Aircraft Company, I focused on low voltage power supply (LVPS) design and testing, performing worst-case stability and efficiency analyses using LTspice alongside alignment of RF communication subassemblies. This deep foundation in power electronics directly supports the requirements of testing high-reliability power and digital systems.

My recent experience includes conducting verification and validation (V&V) on surgical consoles and PCB assemblies at Alcon using high-speed oscilloscopes and logic analyzers, as well as executing ICT and functional testing at Micro Analog Inc. to diagnose root-cause component failures and perform precision SMT rework. Furthermore, at General Micro Systems, I built, tested, and validated ruggedized computing hardware, network switches, and routers while authoring test procedures and deploying automated validation scripts in Linux and Windows environments.

Residing in Ontario, CA, I am within a convenient commute to your Anaheim facility and ready to contribute immediately to L3Harris's test engineering operations, Failure Review Board (FRB) evaluations, and lab test setups[cite: 1, 3]. Thank you for your time and consideration, and I look forward to discussing how my power and digital hardware testing background aligns with your project goals.

Sincerely,

Jim Ngo
